

LTX-21 Design Information

The LTX-21 Trend Interface provides a control interface to 16 A/C units

Datasheets on the RealTime website provide information on engineering and operating options

Each LTX-21 connects to an IQ2xx or IQ3 controller through the supervisor port, the cable is supplied by RealTime.

Systems Configuration

A LonMaker plug-in is available from RealTime for system configuration

LonMaker for Windows is required to install and configure the system

The Lon network is unshielded twisted pair

DMS504B51 Design Guidelines

The DMS504B51 interface handles a maximum of 64 indoor units. Four LTX-21s will handle this maximum amount of units.
